TECHNICAL SKILLS

- **Languages:** Java, TypeScript, JavaScript, Golang, Python, Bash, SQL
- **Frontend:** Angular, Vue, React, HTML/CSS, PWAs
- **Backend & Architecture:** Spring Boot, Node.js, REST, Microservices, Serverless, Distributed Systems, Event-Driven Architecture
- **Data:** DynamoDB, RDS, PostgreSQL, NoSQL, Amazon SQS, GraphQL
- **Cloud & Infra:** AWS, Docker, Kubernetes, Terraform, CI/CD, Azure DevOps, GitHub Actions, Jenkins
- **AI/ML Integration:** LLM APIs, AI Vision tooling, AWS Textract

EXPERIENCE

Senior Software Engineer

September 2021 – Present

CLEAResult Consulting, Inc.

Austin, TX

- Tech lead for a squad of 10–15 engineers, driving architecture decisions, technical grooming, and quality standards that enabled delivery of over 3,500 user stories in 2025 on a consistent 4-week release schedule.
- Engineering owner of the enrollment application platform— a suite of 12+ microservices spanning Docker, AWS Lambda, SQS, DynamoDB, and RDS— which has generated over \$60 million in energy incentives across dozens of clients since conception.
- Designed and built a centralized configuration service enabling simultaneous management of hundreds of client environments, eliminating per-client infrastructure sprawl and significantly reducing onboarding time for new programs.
- Led the AI development initiative at CLEAResult by architecting a service leveraging LLM and OCR integrations to fully automate paper incentive application processing, projected to reduce manual processing costs by 65%.
- Delivered full-stack features across Magento, Vue, and Salesforce storefronts to support end-to-end customer and program manager journeys, adhering to SOC2 compliance standards throughout.

Software Engineer

September 2018 – September 2021

IHeartMedia, Inc.

Austin, TX

- Built the core user interface of the ad tech platform using Angular, AG Grid, and Material Design, advancing the product from proof of concept to release and generating millions of dollars in new ad revenue.
- Designed and implemented a series of backend features, including an ad spot ranking algorithm using Java, Spring Boot, and Amazon SQS that improved ad scheduling efficiency by up to 80%.
- Engineering owner of over half a dozen services built with Docker, Kubernetes, and HashiCorp technologies, maintaining 99.99% uptime while providing scalable tooling for both end users and internal platform teams.
- Collaborated with global contractors and internal business partners to translate complex business requirements into cloud-native technical solutions.

DevOps Engineer Intern

June 2018 – August 2018

IHeartMedia, Inc.

Austin, TX

- Built a scalable health monitoring dashboard using the ELK stack to aggregate real-time telemetry from 40+ internal services, enabling immediate incident detection and rapid response.
- Developed fully automated CI/CD pipelines using Jenkins, AWS, and Python/Bash scripting, achieving sub-60-second deployment cycles from commit to production.
- Managed production-level serverless services end-to-end under senior engineer mentorship, coordinating releases within an Agile delivery process.

EDUCATION

Texas State University

San Marcos, TX

Bachelor of Science in Computer Science, Minor in Applied Mathematics

December 2018

CERTIFICATIONS

Amazon Web Services Solutions Architect – Professional

January 2026

Amazon Web Services (AWS)
